ournal of CRYSTAL AND
MOLECULAR STRUCTURE—Volume 10, 1980

tors

F. C. LADD, Department of Chemical Physics, University of Surrey, England
DONOHUE, Department of Chemistry, University of Pennsylvania, Philadelphia, Pennsylvania, U.S.A.

torial Board

BERMAN, Institute for Cancer Research, Philadelphia, U.S.A.
ERNAL, Department of Chemistry, University of Houston, U.S.A.
T. BEURSKENS, Laboratorium voor Anorganische Chemie, Katholieke Universiteit, The Netherlands
. A. BOEYENS, Department of Chemistry, University of the Witwatersrand, Johannesburg, South Africa
E. BUGG, Department of Biochemistry, University of Alabama, U.S.A.
CALIFANO, Istituto di Chimica Fisica, Università di Firenze, Italy
CLASTRE, Laboratoire de Cristallographie et de Physique Cristalline, Université de Bordeaux, France
COPPENS, Department of Chemistry, State University of New York at Buffalo, U.S.A.
DOBLER, Laboratorium für Organische Chemie (ETH), Zürich, Switzerland
L. DUAX, Molecular Biophysics Department, Medical Foundation of Buffalo Research Laboratories, U.S.A.
FERGUSON, Department of Chemistry, University of Guelph, Ontario, Canada
HANIC, Slovenská Akadémia Vied, ústav anorganickej chemie, Czechoslovakia
H. HERBSTEIN, Department of Chemistry, Israel Institute of Technology, Israel
H. JENSEN, Department of Biological Structure, University of Washington, Seattle, U.S.A.
KARTHA, Center for Crystallographic Research, Buffalo, U.S.A.
F. A. KETTLE, School for Chemical Sciences, University of East Anglia, England
KOPELMAN, Department of Chemistry, University of Michigan, U.S.A.
C. LEYTE, Chemiecomplex, Rijksuniversiteit Leiden, The Netherlands
MARSH, Department of Chemistry, California Institute of Technology, Pasadena, U.S.A.
F. MASON, Department of Chemistry, King's College, University of London, England
McL. MATHIESON, Chemical Research Laboratories, C.S.I.R.O., Australia
van MEERSCHE, Laboratoire de Chim.-Phys. et de Cristallographie, Université de Louvain, Belgium
C. NYBURG, Department of Chemistry, University of Toronto, Canada
R. PENFOLD, Department of Chemistry, University of Canterbury, New Zealand
ROGERS, Department of Chemistry, Imperial College of Science and Technology, University of London, England
S. ROSS, Department of Chemistry, Australian National University, Australia
N. SAHA, Saha Institute of Nuclear Physics, India
G. WATSON, University Chemical Laboratory, Cambridge, England
A. WEBB, Department of Chemical Physics, University of Surrey, England

rnal of CRYSTAL AND MOLECULAR STRUCTURE publishes crystallographic and spectroscopic studies of the structures of stals, molecules, and other atomic assemblies. Consequently, JCMS addresses itself not only to crystallographers and spectroscos, but also to chemists, physicists, biochemists, biologists, and all others who seek and use the results of structural investigations. IS publishes reports of original research as full-length Articles, Notes, and Research Communications; it also publishes Book iews. All papers will be published in English, and every effort will be made to publish Articles and Notes within six months he receipt of the manuscript. Research Communications form a medium for the rapid publication of short papers of current rest. JCMS participates in the British Library Lending Division Supplementary Publications Scheme for the deposition of data. anticipated that the items deposited will be mainly crystallographic structure factor tables and spectroscopic frequency asments, in cases where the referees do not recommend their publication.

sequent to the publication of a Research Communication, its authors are at liberty to publish a full-length article containing same material according to their choice. It is asked both that the Research Communication be presented significantly before appearance of the full paper and, for reference purposes, that the full paper acknowledge the earlier publication in JCMS.

submission of a manuscript is a representation by its contributors that the manuscript has not been copyrighted, published, ubmitted for publication elsewhere. Papers accepted for publication together with data pertaining thereto which are deposited the British Library Lending Division (see Instructions for Contributors, 10) become the copyright of the publisher. The tent of papers is the sole responsibility of the contributors, and publication in JCMS does not necessarily imply the Editors' the publisher's concurrence.

lished triannually by Plenum Publishing Corporation, 233 Spring Street, New York, N.Y. 10013. Subscription orders should ddressed to the publisher. *Journal of CRYSTAL AND MOLECULAR STRUCTURE* is abstracted or indexed in Chemical tracts, Chemical Titles, Current Contents, Referativnyi Zhurnal, Science Citation Index, and Solid State Abstracts Journal.
980 Plenum Publishing Corporation. *Journal of CRYSTAL AND MOLECULAR STRUCTURE* participates in the program Copyright Clearance Center, Inc. The appearance of a code line at the bottom of the first page of an article in this journal cates the copyright owner's consent that copies of the article may be made for personal or internal use. However, this con- is given on the condition that the copier pay the stated per-copy fee through the Copyright Clearance Center, Inc. for all ring not explicitly permitted by Sections 107 or 108 of the U.S. Copyright Law. It does not extend to other kinds of copying, as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, to the reprinting of figures, tables, and text excerpts.

scription rates:
lume 10, 1980 (6 issues) $68.00 (outside the U.S., $78.00).
lume 11, 1981 (6 issues) $68.00 (outside the U.S., $78.00).

ed in USA.

Journal of CRYSTAL and MOLECULAR STRUCTURE

Volume 10, Numbers 1/2, April 1980

Contents

Crystal and molecular structure of bis(aminomethylphosphonate)-copper(II). *T. Głowiak, W. Sawka-Dobrowolska, B. Jeżowska-Trzebiatowska, and A. Antonow* 1

Identification of the conformational type of seven-membered rings. *Ideletta K. Boessenkool and Jan C. A. Boeyens* 11

Binding of alkaline earth metal ions to nucleotides: crystal structure of a hydrated strontium salt of inosine-5′-monophosphate. *Edwin A. Brown and Charles E. Bugg* 19

Steroids and related studies, Part LIII. Structure and function of synthetic bisquaternary aza steroidal neuromuscular blocking agents. *Rex A. Palmer, Mohammed A. Kalam, Harkishan Singh, and Dharam Paul* 31

Journal of CRYSTAL and MOLECULAR STRUCTURE

Volume 10, Nos. 3/4, August 1980

Contents

Crystal and molecular structure of dichloro(*R*(+)-*N*,*N*,*N*′,*N*′-tetramethyl-1,2-propylenediamine)cobalt(II). *Reiko Kuroda and Stephen F. Mason* 55

Crystal structure of dicyanatobis(pyridinato)copper(II). *F. Valach, M. Dunaj-Jurčo, and M. Handlovič* 61

Crystal and molecular structure of 17-β-methyllupanine perchlorate. *Ewa Skrzypczak-Jankun, Hanna Małuszyńska, Anna Perkowska, and Zygmunt Kałuski* 67

Crystal and molecular structure of 17-β-methyl-α-isolupanine perchlorate. *Hanna Małuszyńska, Ewa Skrzypczak-Jankun, Anna Perkowska, and Zygmunt Kałuski* 75

Crystallographic and spectroscopic study of 4,4′-diaminobenzophenone. *G. P. M. van der Velden and J. H. Noordik* 83

NOTE

Potential energy calculations and stereochemical studies of 5′-thiomethyladenosine: a catabolite of *S*-adenosylmethionine. *N. Borkakoti and R. A. Palmer* 93

BOOK REVIEWS 101

Journal of CRYSTAL and MOLECULAR STRUCTURE

Volume 10, Numbers 5/6, December 1980

Contents

Photochemical reaction products. CI: 8*b*-methoxy-1,3-diphenyl-2*a*,8*b*-dihydrocyclobuta[a]naphthalene. CII: 8*b*-methoxy-2,3-diphenyl-2*a*,8*b*-dihydrocyclobuta[a]naphthalene. *B. J. Poppleton* 103

Crystal and molecular structure of dichlorofluoroacetamide. *Dale Pace, William E. Hunter, Riz Shakir, Lowell D. Kispert, and Jerry L. Atwood* 115

Lattice strain and misfit dislocations in GaAs–GaAlAsP heterojunctions. *J. Nishizawa, Y. Okuno, M. Fukase, and H. Tadano* 123

Crystal structure of μ-adeninatobis(methylmercury(II))perchlorate monohydrate. *André L. Beauchamp* 149

NOTES

Crystal structures of two local anesthetics: dibucaine · HCl · H_2O and dimethisoquin · HCl · H_2O. II. Revised parameters, bond distances, and bond angles. *Jerry Donohue and Barbara Sindel Hayward* 157

Cesium diiododimethylaluminate *p*-xylene solvate: Change in space group. *Richard E. Marsh* 163

Steric congestion in gibberellin A_4 and gibberellin A_{13} methyl esters. *S. A. Thomas* 167
